Objective

Looking for a software and/or web development internship role for the summer of 2022. Hoping to utilize a variety of skills gained through my education and personal ventures in order to make meaningful contributions while also gaining experience to sharpen my skills.

Education

Purdue University, West Lafayette, Indiana (2020-2024)

- Bachelor of Science in Computer Science
- Relevant Courses: Linear Algebra, C programming, Object-Oriented Programming(Java), Data Structures and Algorithms, Computer Architectures, and Foundations of Computer Science

Work Experience

Software/Web Development Intern, Popular Diagnostics Centre Ltd., Dhaka, Bangladesh

June 2021- Aug 2021

- Created a task management application for use at their hospitals from scratch. The app was built from the ground up using primarily Java.
- Made improvements to their existing website which increased functionality and made the website more aesthetically pleasing. The changes were made using HTML, Bootstrap, CSS, and JavaScript

Personal Projects

Dhaka Boat Club Website

Aug 2021- Present

Made a website from scratch for a popular country club in Bangladesh. The website is reactive for Laptops, Tablets and Phones. It allows members to login, order food, and make reservations for dining. I primarily used HTML, CSS and JavaScript to make it.

Skills and Qualifications

Languages: Java, C, HTML, CSS, JavaScript(JS), SQL, Python

Frameworks and Tools: NodeJS, Bootstrap, ReactJS, Git, ROS, Google Firebase
